(54) Title: PEELABLE LID STRUCTURE

WO 2004/014758 A1

(57) **Abstract:** A peelable lid structure (1) particularly for use in the closing of food cans has a tab (3) which is folded over the centre panel (4) and secured in the folded position for processing of can contents and/or handling operations. As the tab (3) is secured, an inexpensive laminate structure which requires little or no aluminium content can be used. Methods of forming the peelable lid structure (1) include exposing a layer of heat sealable material and/or an adhesive layer so that the tab (3) can be folded over and adhered to this layer, for example by heat sealing.
